PREFACE TO VOLUME VIL

THIS volume contains the words beginning with the letters O and P. Including the Main words, to which separate articles are allotted, the special Combinations or compounds, explained and illustrated under the Main words, and the Subordinate entries of obsolete and variant forms entered in their alphabetical places, with a reference to the Main words under which they are treated and illustrated, the number of words amounts to 41,667. The Combinations of simple and obvious meaning, of which lists are given under the Main words, without separate explanation, but in most cases with illustrative quotations, number 7,203, raising the actual total of words and compounds recorded in the volume to 48,870.

These words are thus distributed among the letters:

	Main words.	Subordinate works	Special Communications	Continue Continue	of Words.	Mrs. of Opporations
O (385 pages)	7,118	r, igil	6ga	4,428	11,151	28,676
P-Pf (404 ii) Ph-Py (896 ii)	15,974	3,384	1,003	2-270	11,770	41,556 54.575
Total	30,300	6.392	4/974	7,003	48,876	175,139

Considered as to their status in the language, the Main words are distinguished approximately into those which are native or fully naturalized, and still carrent, those now obsolete (marked †), and those considered to be allow or imperfectly naturalized (marked ‡), although in the case of both the latter it is often difficult to draw the line. The distribution of the 30,300 Main words is approximately as follows:

	Correct.	Chulere	Allen.	Total
0	8-347	1,306	855	27114
P-Pf	3+471	1,000	536	2,008
Ph-Py	11/303	4,648	1,044	33:974
Total*	23,530	5-338	1,843	20,300

Etymologically considered, the O section and the P section of the English vocabulary differ greatly in the proportions of their elements. O is in this respect an ordinary letter, containing a good proportion of words of Anglo-Saxon derivation, beside those of later adoption, from Scandinavian, Old French, Latin, and Greek, and more distant languages. Among the words that go back to Old English use are the prepositions of (to the lexicographer the longest and most difficult of English prepositions, the treatment of which in this Dictionary occupies 18 columns), off, on, over, the adverbs off, often, out, the conjunction or, the numeral and pronoun one with its derivatives one, only, etc., the pronominal words other, one, one, the verbs ought, one, one: all of great interest to the student of the historical grammar of the language. There are also numerous well-known substantives, as only, onlow, our, out, outh, over, ordeal, even, out, and important adjectives as old and open. To these must be added the words compounded with out (1,450, including 775 Main words), and over (2,175, including 1,413 Main words). The out- and over-compounds occupy more than a fourth of O. The words from Latin include the compounds in oth and its phonetic variants, oc., of., op., and important words such as order and its family. Among the words from Greek are the numerous compounds in ortho-, and the chemical terms related to oxyges.

In P. on the other hand, the words that go back to Old English are a very small company. Of the 23,000 Main words here dealt with, about 80 appear in the Anglo-Saxon Dictionary, of which, however.

* Adding these to the words in Volumes I-VI, we have for the parties of the alphabet from A to P the following figures:

Malic resdu.	Career.	Otoles.	Alien.	Subsections:	Continues.	Condinations	Total
166,579	145,134	11,197	7,000	40,440	30,139	25,819	154,017

For the letters O and P, the comparative scale of this work and of certain other Dictionaries is shown by the following figures:

	Jones.	Cond's Recolepation	"Denny" bis.	"Fink's Standark"	Horn
Words remeded	4475	19,775	15,000	17,490	45.534
Words Electrical by quotations Number of illustrative quantiess.	10,000	5-51T	8,350 85,340	\$1579 5/943	375,739

The quotations in Richardson's Electionary in O and P are 3,640.

NEW ENGLISH DICTIONARY.

50 were borrowings from Latin, leaving only about 30 really 'native', most of them found in other Germanic languages. Among the chief of these are pau, path, penny, pith, play, plight, plongh, peck, pool, pretty, prick, puff, pull, put. Of these the two last scarcely appear in Old English, but have since become verbs of great importance; the article PUT is, after Go, the longest as yet in the Dictionary, and has proved one of the most difficult. From causes stated in the article on the letter P, this was the rarest initial consonant in Old English, occupying in Bosworth-Toller's Anglo-Saxon Dictionary only one-fifth of the space of O. But its constant accessions from other languages, and apparently its aptitude to form onomatoposic words, have made it in the modern dictionary next in compass to S and C, with which it forms a triad of gigantic letters, containing together considerably more than a fourth of all the words in the language. The accessions began with the 50 words from Latin already mentioned, some, like pile, pit, and powed, of West Germanic age, but most of them only pre-Conquest English, either ecclesiastical, as poll, pope, priest, prime, or names of foreign plants and animals, as paraley, pear, peace, pepper, peafooch). The accessions continued with the words from Old French, in origin mostly Latin, and subsequently with words formed directly from Latin (sometimes ultimately from Greek), and also, from the 16th century, in the terminology of philosophy and science, from Greek directly. From the 16th century, words began to crowd in from other European and more distant tongues, until now there are to be found in the P division of this volume representatives of more than 50 languages. To these have been added a considerable number of words of unknown origin, many no doubt onomatoposius of English or its dialects. The compass of the letter has been greatly enlarged by the words formed with the Latin prefixes for, feetpre-, pro- (with its OF, form pur.), and with the Greek prefixes para-, peri-, pro-, and the formatives paw-, pants., philo., paly., pseudo., pyro., etc. The words in Ptt are an alien group, representing (with few exceptions) Greek words in 4, for which Roman spelling substituted PH, and which thus come in between PEand PI-, at once to swell the P vocabulary and to increase its Greek elements. Of the 23,000 Main words in P, nearly 7,000-more than one-third of the whole, are of Greek derivation, or are formed with a Greek prefix or first element. This is a proportion much larger than obtains in the language as a whole.

The material collected up to 1885 for O to OM- was arranged chronologically and in part sub-edited by Miss Margaret Haig, of Blairhill, Stirlingshire (now Mrs. Alexander Stuart). The section Oc- to OPPRO-BETUM was skilfully sub-edited by the late Rev. W. J. Löwenberg, of Starkies, Bury, 1887-46, who died in 1893, before seeing any part of O in type. The section OPPUGN to OW- was sub-edited 1895-8 by Mr. James Bartlett, of Cloverlea, Bramley, Guildford, who after more than 20 years' voluntary work at the Dictionary, during which he sub-edited also G, parts of M, R, and S, died on 15 August, 1908. The very technical section from Ox to Oz- was arranged and sub-edited by Mr. H. A. Nesbitt, B.A. in 1895. For PA-, the material collected by the Philological Society had, in consequence of the death of the person who undertook its sub-editing, been nearly all lost or destroyed. It had in consequence to be collected anew, which was largely done by the late Mr. E. S. Jackson, M.A., Plymouth; as it accomplated, it was arranged, and finally sub-edited, 1882-7, by the late Miss J. E. A. Brown, of Cirencester. The slips for PE- to PELY- were sub-edited in 1884 by Mr. James Britton, F.L.S.; those for PEM- to PERF- by Mr. R. M'Lintock, of Livespool, in 1885 and 1893-6; and those for PERS- to PIL- by Mr. W. J. Anderson, then of Markinch, who died in February, 1900. The large section PIM- to PROF- was laboriously sub-edited by Miss J. E. A. Brown, one of the most devoted and enthusiastic of our volunteer helpers, between 1900 and her sudden death on 19 February, 1907. Her work was ably continued, PROFIT to PRV, by the late Mr. C. B. Winchester, in 1907-8. The earlier material for PR- to Pt- had been put in order by the late Mr. P. W. Jacob in 1885. The whole section PE- to Pity- was revised, with much new material, 1901-4, by our valued coadjutor the Rev. C. B. Mount, M.A., who also sub-edited, with much original research, the last section Psi to PVXIS in 1904-7. The generous and, in many cases, long-continued services of these voluntary collaborators, so few of whom, alas! survive, call for the fullest and most grateful recognition.

In the revision and improvement of the work in the proof stage, continuous and indefatigable help has been rendered by Misses E. P. and Edith Thompson, of Lamcown, Bath, whose investigations of the sense-history of difficult words, have been most fruitful and valuable; also by the Rev. Camon Powfer, D.C.L., Durham, the Rev. J. R. Johnston, B.D., Falkisk, Mr. A. Caland, of Wageningen, Holland, Mossicur F. J. Amours, Glasgow, and in later parts by Professor F. E. Bumby, Nottlingham. Assistance with the proofs has been only a small part of the gratuitous services rendered to the Dictionary by Mr. R. J. Whitwell, B.Litt. Oxon, who has contributed to the history of legal, historical, and other words by special investigations in the Bodleian and Codrington Libraries, the British Museum, and the Public Record Office. Many of our earlier illustrations for such words are the fruit of his researches. Five of our realous helpers in this department have been removed by death during the preparation of this volume: the Right Hon, Lord Aldenham, who had sub-edited parts of C and K for the Philological Society, and had read our proofs from the beginning, died in September, 1907, Dr. W. Sykes, F.S.A., who supplied

most of our quotations for recent medical terms, died in September, 1908; Mr. E. L. Brandreth, who had sub-edited portions of H. K., and N. besides reading our proofs, and verifying references in the British Museum Library, died in December, 1907; Mr. C. B. Winchester, who, as reader, sub-editor, and, after the death of Mr. Brandreth, collater of quotations in the British Museum, was the most valued of our later volunteer conditators, died in December, 1908; Mr. Chichester Hart, of Curraghbiagh, Portsalon, Decegal, who added to the proofs many quotations from 16th and 17th century dramatists, died in 1908.

The scholars and men of science who have given their assistance in the present volume include nearly all those who have been named in the Prefaces to volumes V and VI, to whom again grateful thanks are recorded. More especially must mention be made of etymological and philological help rendered by Monsieur Paul Meyer, Membre de l'Institut, Paris, and Professor Eduard Séevers, of Leipzig, both Honorary Fellows of the British Academy. Assistance on points of Etymology and Philology has also been received from Professors Napler, Wright, R.
